

GRAND BASSARA™ SERIES

High Launch and Mid Spin

GRAND BASSARA

MITSUBISHI CHEMICAL

GB29 FLEX-LITE

Made in Japan using the tightest tolerances ($\pm 1g \pm 1cpm$), most rigorous quality control measures and the finest lightweight materials available, we have developed our most innovative high-performance, 29 and 39-gram ultra-light-weight golf shafts to date.

GRAND BASSARA™ not only delivers strength, stability and performance, but also superior feel. Our ability to push the limits of ultra-lightweight and performance is largely due to strategic use of an innovative new proprietary carbon fiber material – MR70. MR70 is 20% stronger and 10% greater modulus elasticity than comparable materials, and has helped us take our game to the next level.

GRAND BASSARA™ is finished with an ultra-premium Ion Plating (IP) with a jet black dye, and sophisticated holographic decal.
