

C6™ RED

High Launch and Mid Spin

It's not just about flex, it's about optimizing shaft frequency, weight, torque, profile, launch and spin, to help individual players hit it as long, straight and as consistent possible. We wanted to give our premium authorized club builders and fitters an exclusive line of high-performance golf shafts that can be fine-tuned to a golfer's specific performance needs. Introducing the C6™ Series by Mitsubishi Chemical.

C6™ Red is a more active profile engineered to help players of all skill levels maximize their launch conditions and carry distance. It's higher launching trajectory and draw bias characteristics are a perfect compliment to the C6 Blue design.
