Diamana™

RF 50 FLEX S

MITSUBISHI CHEMICAL

We've taken our tour proven, time tested Red Board profile and enhanced it using Mitsubishi Chemical's latest design and material innovations, to create the next generation Diamana™ RF-Series. Strategically positioned DIALEAD™ Pitch Fiber, MR70 and boron fiber infused hybrid prepreg deliver unmatched strength, stability and performance from this higher launching profile.

The Diamana™ RF-Series represents the next generation version of MCA GOLF's signature "active" bend profile. The new RF-Series, like its most recent predecessor the Diamana™ R-Series, incorporates high-strength DIALEAD™ Pitch Fiber by Mitsubishi Chemical into the butt-section of the shaft, adding unprecedented strength and control during shaft loading and unloading.
