

# TENSEI™ CK PRO WHITE

## Low Launch and Low Spin

TENSEI™ CK Pro White expands the TENSEI™ CK Series – which features a multi-material design that incorporates more performance-oriented materials than we’ve ever used in a shaft. Building off of the classic tip-stiff, low-launch bend profile preferred by stronger players the TENSEI™ CK Pro White incorporates the same Carbon Fiber/DuPont™ Kevlar® (CK) weave in the butt-section as the Pro Blue – providing enhanced stability and maximum feel. This series also incorporates High Modulus, premium 40-Ton prepreg throughout the shaft. A boron-reinforced tip-section delivers lower torque, and promotes tour preferred control and stability.
