

Diamana™ PD

LOW LAUNCH, LOW/MID SPIN

WOOD SHAFTS

The second installment in Diamana™ 5th Generation is here with Diamana™ PD. Offering the same Consistent Feel Design fitting experience as Diamana™ TB, the Diamana™ PD shafts feel more active in the hands with a stronger, stiffer tip to promote a lower-launching ball flight. Diamana™ PD is constructed using our exclusive dual-phase XLINK™ Tech Resin System, high modulus MR70, and Boron fiber to create a powerful profile with a smooth feel that remains stable throughout the swing.
